

Career Objective

In May of 2015 I will graduate from Iowa State, and officially enter the workforce as a full time software engineer. I already know that I will begin my career as an engineer at Workiva llc based here in Ames. I want to make sure that while I am at Workiva I put forth my full efforts to be the best professional I can be. I will work to develop reliable, extensible code, while treating my teammates with respect. After a few years, I want to be a lead engineer for my own team, then an architect. In 15 years I may be ready to be outside of the day to day work of developing code – at which point I will consider people management rather than product management.
